

WAHID NAHID KHAN

Durgapur, India | +91 9431935586|wahidahidkhan.681@gmail.com
Computer Science undergraduate proficient in Java with strong DSA and CS fundamentals.

EDUCATION

B.Tech in Information Technology

Bengal College of Engineering and Technology

Senior Secondary — Class XII (JAC)

DAV Public School, Moonidih

2023 – 2027 (Expected)

CGPA: **7.1/ 10**

2022

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, (MySQL, PostgreSQL)

Artificial Intelligence & ML: Computer Vision, OpenCV, YOLO, NumPy, Machine Learning

Web & Frameworks: React.js, Node.js, Express.js, Flask, MongoDB, Tailwind CSS

DevOps & Tools: Git, GitHub, REST APIs, VS Code, Postman

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks, Operating Systems

EXPERIENCE

Full Stack Developer Intern

AICTE

Remote, India

Feb 2026 – Present

- Architected a real-time collaborative management system using **React.js**, **Node.js**, **Express.js**, and **Socket.io** for live task updates.
- Integrated **MongoDB** with **Mongoose** indexing, reducing data retrieval latency by 35% across multi-tenant user dashboards.
- Implemented automated notifications and **JWT** session handling, increasing daily active user engagement efficiency by 20%..

PROJECTS

EduTrack — Interactive Web Learning Management System 2025

2026

Tech Stack: HTML5, CSS3, JavaScript,

- Engineered a dynamic multi-tier web application using **HTML5**, **CSS3**, and **JavaScript** for responsive UI components, improving page load speeds by 30%.
- Designed secure **Java** RESTful API services and indexed **MySQL** database schemas, reducing server query response times under high concurrent load.

AI Weather Application

July 2025

Tech Stack: JavaScript, HTML5, CSS3, REST APIs, Asynchronous Programming

- Developed an asynchronous data ingestion engine processing real-time JSON weather payloads from external RESTful web APIs with zero UI freezing.
- Implemented client-side error handling, caching, and payload validation, improving data retrieval efficiency and reducing redundant network requests by 40%.

CERTIFICATIONS

- Cyber Security Fundamentals — University of London
- Cryptography & Key Management — University of Colorado System
- Industrial Training Certificate — Jindal Steel Plant

ACHIEVEMENTS & EXTRACURRICULARS

- Data Structures & Algorithms Proficiency:** Solved 200+ algorithmic challenges focusing on dynamic programming, graph theory, and complex data structures across competitive coding platforms.
- Active Volunteer, DATRI Registry:** Drove campus awareness campaigns and assisted in registering stem cell donors to support patients with blood disorders.
